H2 前のスペーサーに、HTML アンカーを設定

The screenshot shows a web editor interface with a toolbar at the top. A blue arrow points from the right side of the interface towards the 'HTML' tab in the toolbar.

The main content area displays three cards with placeholder text and images. Above the first card, there is an H2 tag with the class "h2-normal".

On the right side, a sidebar titled "カスタムバリエーション" (Custom Variation) is open. In the "高度な設定" (Advanced Settings) section, there is a field labeled "HTML アンカー" containing the value "about\_c".

Below the editor, a preview window shows three cards with placeholder text and images. At the bottom, there is a navigation bar with arrows and a search bar.

At the very bottom, there is a row of buttons with href values: "/coaching/mentor/single/", "/voice/mentor-coaching\_top/", and "/coaching#about\_c". The third button has a red annotation above it that says "↑アンカーを使用" (Use anchor).
